

BEFORE PRODUCTION BEGINS

Make the scene easier to see.

A clear visual plan gives a team something concrete to discuss. Explore the scene, develop the sequence and share storyboard sheets.

A LOCAL CREATIVE WORKSPACE

Work with installed models on your own machine. The local generation path has no per-generation token bill.

Compatible hardware, installed models, model licences and setup costs still apply.

IN-HOUSE PRE-PRODUCTION BY LATYNRAI

MEET LATYNRAI

Bring a workflow. Start a conversation.

For creators and studios: discuss a focused pilot around a real production task or storyboard sequence.

For investors and partners: explore product validation and the next milestone for creative workflow assistance.

ACRADION

STORYBOARD STUDIO

Direct the shot. Shape the story.

On your machine.
No per-generation
token bill.

LOCAL STORY DEVELOPMENT

DIRECT THE SCENE

Start with visual intent.

Develop panels from text prompts and visual references. Set the shot type and camera angle, then plan movement and transitions.

Direction

Shot Type:

Establishing Shot

Camera Angle:

Eye Level

Movement:

Dolly In

Transition:

FADE IN:

Duration:

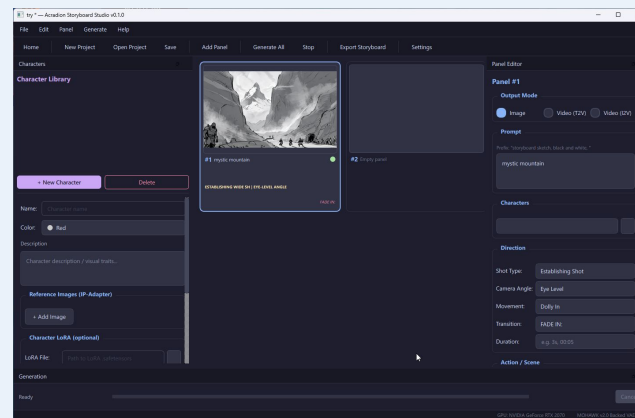

e.g. 3s, 00:05

Add scene action and dialogue to communicate what the shot needs to do.

ACTUAL APPLICATION CONTROLS SHOWN

DEVELOP THE SEQUENCE

A workspace for your story.

EXPLORE AND REFINE

Review panel ideas, work with character references and organize the sequence. Artists guide the look and check the output.

Actual Acradion workspace capture. The visible project contains one generated panel.

YOUR STORY / YOUR MACHINE

SHARE THE PLAN

From panel to team review.

STORYBOARD HANDOFF

Arrange panels into storyboard sheets. Export PNG, JPEG or PDF for the people who need to review the scene.

KEEP THE PROJECT MOVING

Save the project, revisit the sequence and develop the next shot. Bring us a scene to explore in a focused pilot.

See the demo.
